Work Experience

Atomic.VC Koa.js, React, Redux, DevOps, Django, iOS
Full Stack Developer Intern Jan - April '17

- As part of 3-person team, built in 16 weeks from scratch robust apps (5 web, 2 iOS) for new VC vetted & funded ideas.
- Led planning and backend development for medical Alexa. Built RESTful API with Koa.js, PostgreSQL, & Docker.
- Successfully executed tight 2 week sprint with colleague to build a full CMS/internal Reddit using React, Redux, & Koa.js.
- Added asynchronous on-boarding UX flow to iOS file sharing app with CoreBluetooth to identify device proximity.
- Built upload processing endpoints for React/Django app to upload to AWS S3 & integrate with Machine Learning model.
- Learned new frameworks quickly, eagerly collaborated with team, & took initiative constantly to finish weekly sprints.

Blitzen Django, JavaScript, Google Analytics, Optimizely
Developer & Growth Intern April - Aug '16

- Set up Optimizely A/B split tests. Built new JavaScript pricing slider & image carousel → New user signups grew 74%.

Videostream Web, JavaScript, Google Analytics, Optimizely
Growth Intern May - Aug '15

- Developed & A/B tested new site & in-app purchase flow → App downloads up 32%, Weekly active users up 12%.

Teknically Web, Google Analytics, Optimizely
Co-Founder & CEO Oct '13 - Dec '14

- Won \$65,000 in competition. Google for Entrepreneurs F14.
- Wrote base 100 scoring algorithms for Google Analytics data.

Projects

andrewparadi/.files Mar '17 - Current

- Ansible provisioning of macOS & Linux with custom security roles: domain blocking, disabling call home, disk encryption.

discourse/discourse-slack-official Feb '17

- Added search command to Discourse Slack Bot in Ruby.

andrewparadi/hack-the-fire Hack the North Sept '17

- Python implementation of perceptron for Calgary Fire Dept.

andrewparadi/resume-scoreboard Hack the North Sept '16

- AngularJS2 Material Design UX to score resume vs. job descr.

gabehab/htn2015 Hack the North Sept '15

- Built custom Google Maps JS API interface and store profiles.

branchow/StockSlate Hack the North Sept '14

- Won Bloomberg API Prize. Wrote scoring algorithms to analyze stock portfolios against famous investor strategies.
